7HERTZ

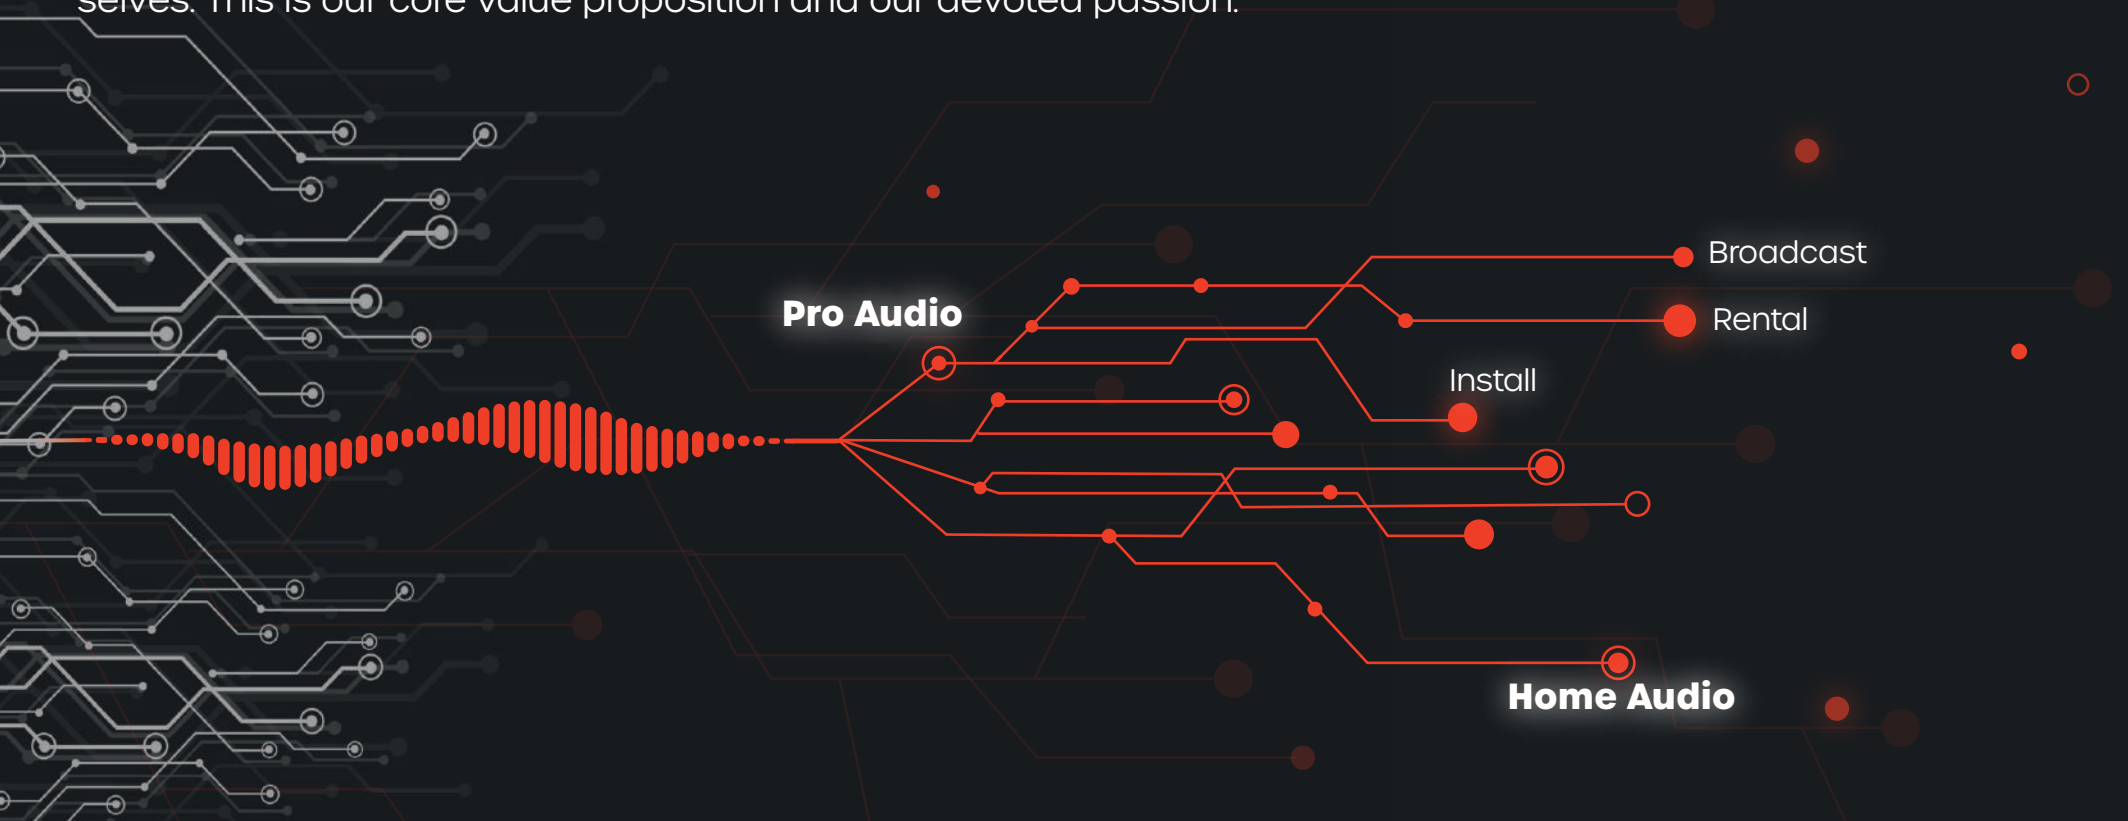
COMPANY PROFILE

THE SCIENCE BEHIND US

Founded in 2009 in Beirut and now headquartered in Dubai, 7Hertz is a specialist distributor of high-end professional audio equipment. We work with a hand picked portfolio of leading global brands to supply and support audio solutions across the Middle East, GCC and Lebanon.

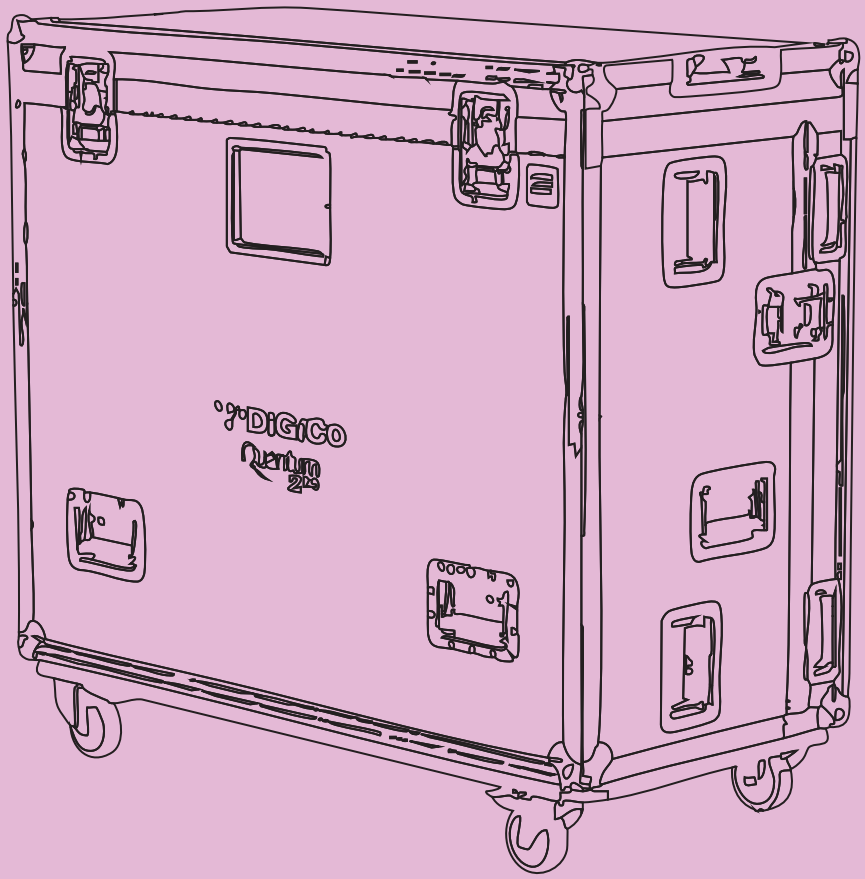
Our focus is on delivering outstanding audio experiences through product expertise, system design, and hands-on engagement with our partners. We offer distribution, design consultancy, training, and commissioning services, all rooted in a deep understanding of the technologies we represent.

We believe that knowledge-sharing and strong technical support are as important as the products themselves. This is our core value proposition and our devoted passion.



In live events, reliability is non-negotiable.

At 7Hertz, we forge partnerships with all the region's rental companies to provide guidance on robust, scalable audio solutions that meet the demands of all live sound scenarios, from concerts to corporate conferencing and everything in between.
Our goal is to ensure you're equipped to deliver on time, on spec, with confidence and without compromise.



What We Offer

- We specify and supply rider ready, proven equipment with no weak links.
- We support your teams with technical guidance and training
- We are committed to future proofing, helping you build balanced, interoperable inventories
- We serve live, corporate and hybrid event suppliers with distinct precision

RENTAL PARTNERS
